IBM[®] Lotus[®] iNotes[™] 8.5.x Ultra-light Mode Reference Card

IBM

The way you interact with the ultra-light mode icons (touch or click) differs depending on whether you are using an Apple iPhone or iPod Touch, or your computer.

In Contacts, when an icon appears in a circle, then there is an actionable task associated. That is, you can touch to dial on an iPhone or to send a message on an iPod Touch. You can also click to send a message on your computer or hover the cursor over an icon to view a phone number.

Home page

lcon	Description
	Open the Inbox view
	Open the Sent view
	Open the All Documents view
	Open the Trash view
