

IBM Software

# Connect 2014

January 26–30 Orlando, Florida

ENERGIZING LIFE'S WORK

## AD302: New Ways to Work with Your IBM Connections Communities

Bruce Roberts, IBM  
[robertsb@us.ibm.com](mailto:robertsb@us.ibm.com)

Luis Benitez, IBM  
[Luis\\_Benitez@us.ibm.com](mailto:Luis_Benitez@us.ibm.com)

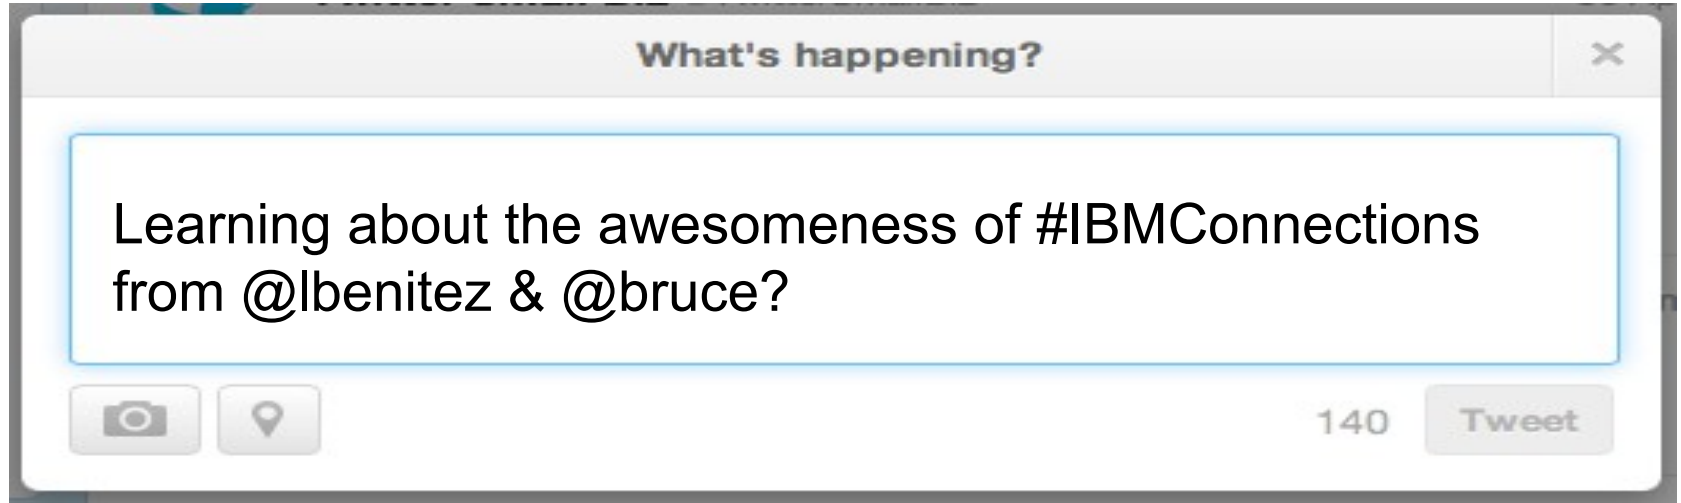

# Agenda

- Introductions
- Connections Communities Overview
- What's New – Quick Intro
- What's New – Deep Dive
  - End-user function AND
  - Public APIs with demo code
- Where to get more information
- Wrap-up
- Q&A

## Share Away...

## Some Market Data

28

# of hours employees  
spend writing  
emails & searching

# That's

70%

of someone's time  
spent in oblivion

# That's time spent searching, instead of...

Re-using intellectual capital to:

- drive growth
- drive innovation
- solve customer problems
- sell more ... !

It's time to discover and re-use!

Don't re-invent  
the **wheel**

# Marketplace Trends

68%

of CxO's focus  
is in social/digital  
interaction

# Marketplace Trends

87%

of CMO's primary  
technology focus  
is collaboration

# Communities

## Hub for Team Collaboration

- Help people who share common interests to exchange and share information and ideas
- Create public, private, and moderated communities
- Share files, watch videos, vote on ideas, plan projects, work with wikis, forums, and more
- Events provides a central place to plan and coordinate team events
- Measure engagement with metrics

# Leading social business communities

Source: Dion Hinchcliffe; <http://zdnet.com/blog/hinchcliffe>

# Example Community Types

Public Relations  
and Marketing

Project  
Execution

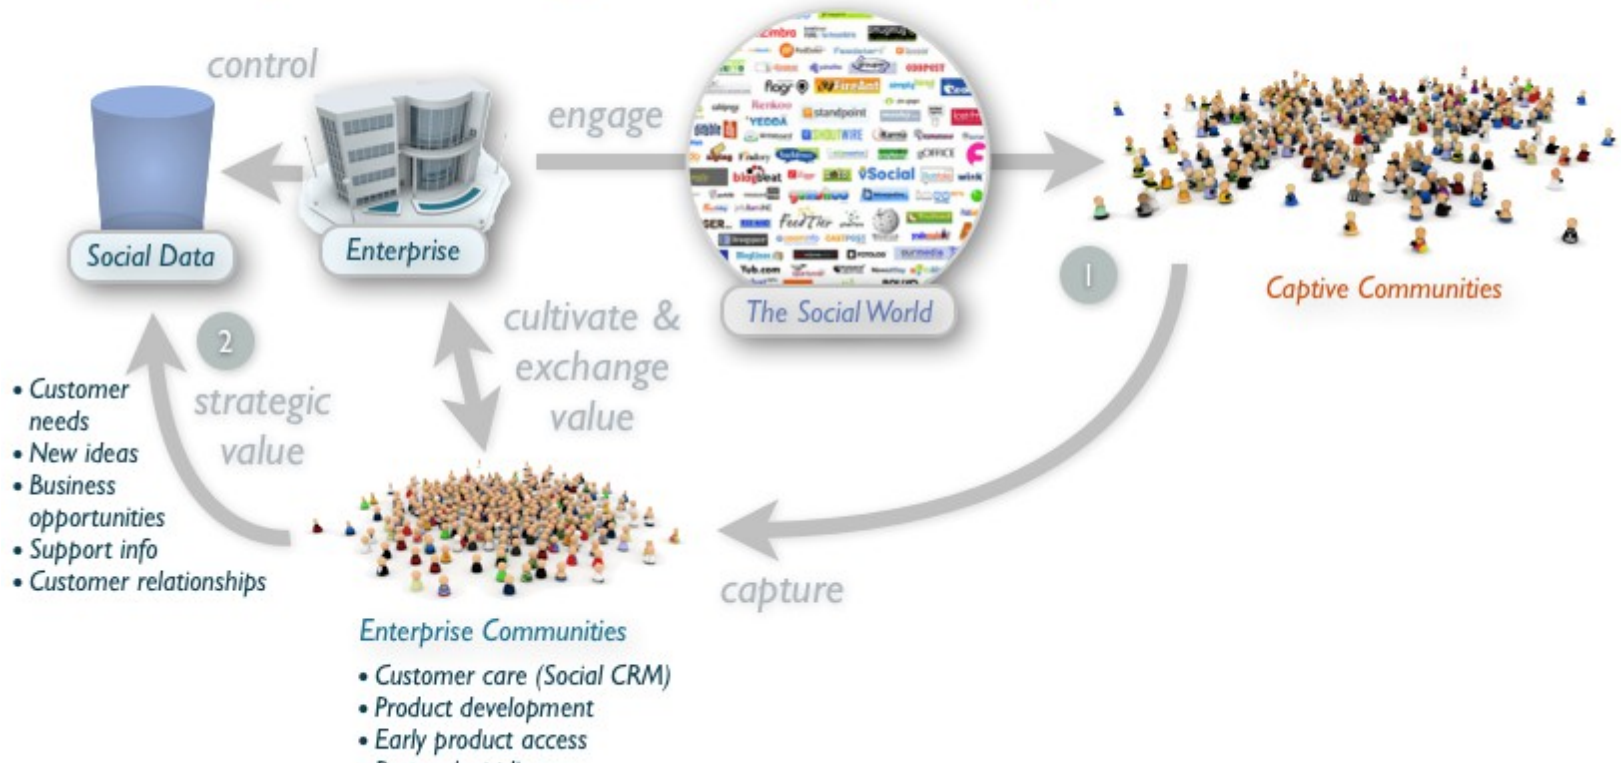

Product and  
Service  
Innovation

Service and  
Support

# Key Social Business Strategies

- 1) Harnessing External Ecosystems
- 2) Relationship + Data Ownership & Control

# What You Can Do Today

## Add Custom Apps to Communities

The screenshot shows the IBM Connections interface for a community named 'Greenwell Product Launch'. The top navigation bar includes links for IBM Connections, Home, Profiles, Communities, and Apps, along with user options like 'Joining Hub', 'Settings', 'Help', and 'Log Out'. Below the navigation bar, there are tabs for 'My Communities' and 'Public Communities', and a search bar. The community name 'Greenwell Product Launch' is prominently displayed, with buttons for 'Follow this Community' and 'Community Actions'. On the left, a sidebar lists navigation options: Overview, Members, Updates, Forums, Bookmarks, Files, Media Gallery, Calendar, Wiki, and Ideation Blog. The main content area is titled 'Overview' and features a 'GREENWELL product launch' logo. It includes tags for 'greenwell', 'launch', and 'product'. There are tabs for 'Recent Updates' and 'Overview'. The 'Forums' section lists several topics: 'IBM Launches Connect Conference to Drive "Social Business"', 'Sales Promotions', 'Single View of Customer', 'Customer Intelligence', and 'What is the project timeline?'. Each topic shows the last post by 'Frank Adams' and the number of replies. On the right, there is a 'Members' section showing 11 members and a 'TwitterMoodz' section with a 'Live Twitter Mood Analysis' gauge. The gauge is a circular meter with a needle pointing to the number 57, indicating a mood score.

# What You Can Do Today

Manage your Communities programmatically

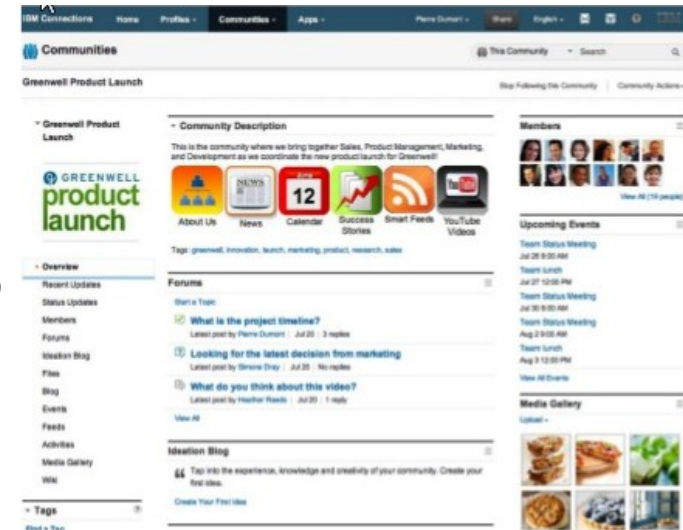

Screenshot To-do..

Over to Bruce for a Deep Dive!

# Communities as Social Center for Groups to Get Work Done!

- Easy for users to get to work!
  - User provisioning for quick start time
  - Simple membership management model and sub-communities
  - Centralized content creation and sharing with well known components like Files, Forums, Wikis, Media Library etc.
  - Cross-component capabilities: tagging, searching, activity stream attention management, etc.
  - Available everywhere: Web, Desktop, Mobile
- Extensible platform:
  - UI extensions via Widget model
  - Programmatic services:
    - Atom based public APIs for programmatic access to Community and Component capabilities
    - Java SPIs for back-end event handling.
- Admin commands for system administration

# Focus of this session

- New Communities capabilities (since Connections 4.0) and their associated admin and programming extensions
- Quick demo of each
- WARNING: entering the “geek” zone :)

GEEK ZONE

# What We'll Cover

- Widget Development
  - Creating custom widgets
  - Programmatic widget manipulation
- Start Page
  - Owner can choose initial page shown for Community
- Communities Trash
  - Recover deleted communities from trash
- Community re-parenting
  - Move Community to be a Sub-Community and vice-versa
- Public API additions and extensions to support programmatic access for each capability
- GOAL – Spark ideas for you to use for your customers and installed base!

# Community Widget Development

# For Widget Writers

- Custom Widgets can be deployed to your server and made available to Community owners
  - Has been available for multiple releases. Find out more in online doc (reference at end of this deck).
- Multiple widget instances supported **\*\*New\*\***
  - Set *uniqueInstance="false"* for your widget definition in widget-config.xml
- Provide a custom title for your widget **\*\*New\*\***
  - Use widget attribute api to set/get widget title:  
`this.iContext.getWidgetAttributes().setItemValue("widgetTitle",form.widgetTitle.value);`
  - Title is persisted
  - Title is surfaced in all Community UI: search tabs, edit tabs, left navigator, etc.

# Widget Feed **\*\*new\*\***

- List Widgets in a Community
- Add/remove/re-position/re-title widgets in a community
- Usage examples now enabled via programmatic access
  - Templating – provision a Community and populate it with Widgets.
- This feed is exercised in IBM products now: Portal, Mobile, others.
- NOTE: For access to underlying content of Widget - use “remote applications” feed.

# Widget Feed

- To get all Widgets
  - `http://<server>/communities/service/atom/community/widgets?communityUuid=<id>`
- To retrieve widgets of a particular type:
  - `http://<server>/communities/service/atom/community/widgets?communityUuid=<id>&widgetDefId=<widgetType>`
  - Note: Multiple widget types can be retrieved with multiple `&widgetDefId` URL params like this:
    - `http:///communities/service/atom/community/widgets?communityUuid=&widgetDefId=CustomLibrary&widgetDefId=Library`

# Widget Feed

- Add a Widget (POST to Widget feed)
  - Post to the feed with widgetDefId, Custom Title(optional), visible or not, column location, location within column
- Modify a widget (PUT to Widget feed)
  - Change title, visible or not, location
- Remove a Widget (DELETE request)

# Widget Feed

## Sample Feed Entry

...

```
<entry xmlns:snx="http://www.ibm.com/xmlns/prod/sn">
  <id>https://brobertsvm3.swg.usma.ibm.com:9444/communities/service/atom/community/widgets?communityUuid=e0a8c3b1-d739-4d16-b12b-f208caa3554b&widgetInstanceId=W1de42d9828ad_4e28_9f67_c910abfe79b6</id>
  <title type="text">Files</title>
  <category term="widget" scheme="http://www.ibm.com/xmlns/prod/sn/type">
    </category>

</entry>
```

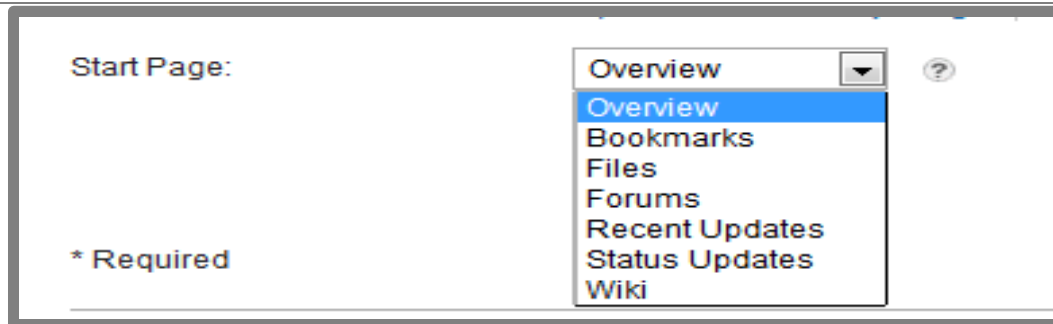

# Widget Feed Demo

# Communities Start Page

## User experience

- Community Owner can optionally determine initial page seen when entering a Community
- Any Community component that appears in left navigation can be made the Start Page
- Use to bring members to most used section of Community
  - Example: Wiki page with full wiki editing to control
  - Control what your Community “front door” looks like.

# Communities Start Page URL addressing changes

- Some changes to Communities URLs
  - Goal – on upgrade, existing bookmarks go to Start Page
  - Can still bookmark the Overview page by bringing it up in browser and bookmarking
  -
- Details:
  - communities/service/html/**communityview**?communityUuid=XXX
    - Redirects to Community start page if one has been set.
  - communities/service/html/**communityoverview**?communityUuid=XXX
    - Goes explicitly to Community overview page, can be used to bookmark overview page.
  - communities/service/html/**communitystart**?communityUuid=XXX **\*\*new\*\***
    - Used to go to community start page if one has been set. Many clients that point to Communities use this url now: Catalog page, Mega-menu, search results, mail messages.

# Communities Start Page Public API Update Support

- Element added to Community instance entry: **<snx:communityStartPage/>**
- No start page set: - empty attribute
  - **<snx:communityStartPage></snx:communityStartPage>**
- Start page selected – attribute shows widget id for start page:
  - **<snx:communityStartPage>W09a7c9eaaf41\_4fac\_9dec\_da3c0caffb3e</snx:communityStartPage>**
- To set/reset start page do PUT to Community instance entry with communitystartPage value desired

# Communities Start Page Demo

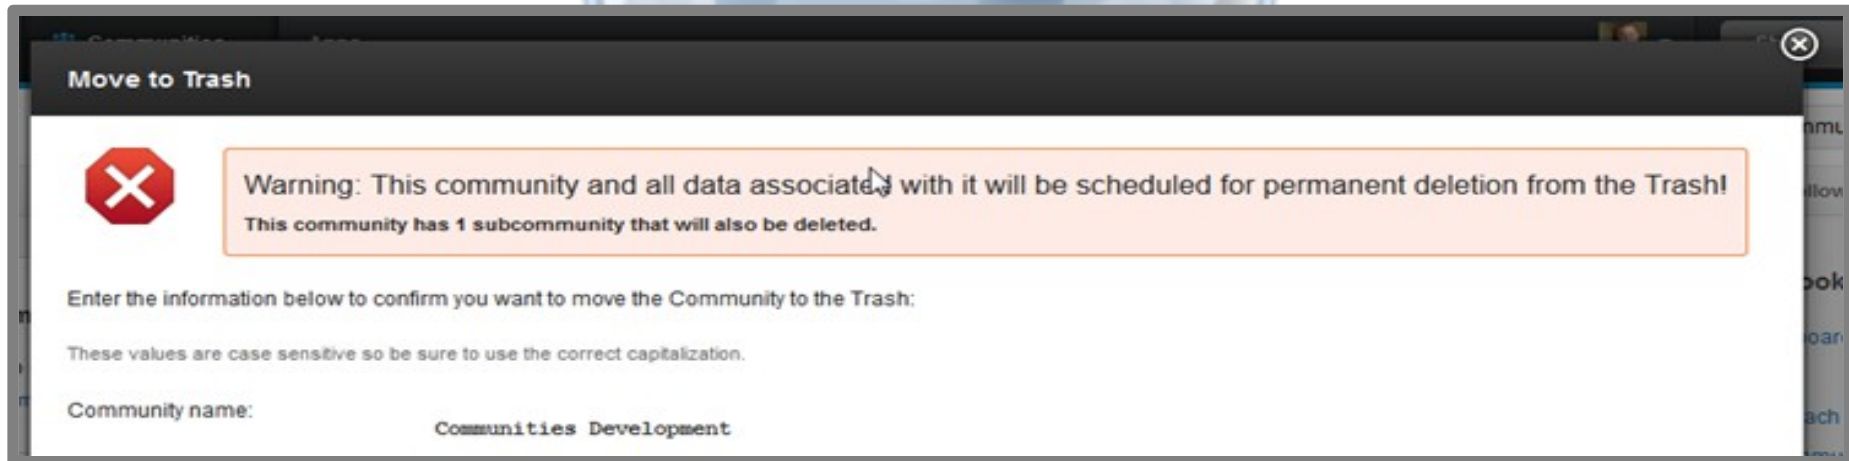

# Communities Trash

# Communities Trash User Experience

- Deleted Communities now go in a Community Trash

**Move to Trash**

 **Warning:** This community and all data associated with it will be scheduled for permanent deletion from the Trash!  
This community has 1 subcommunity that will also be deleted.

Enter the information below to confirm you want to move the Community to the Trash:

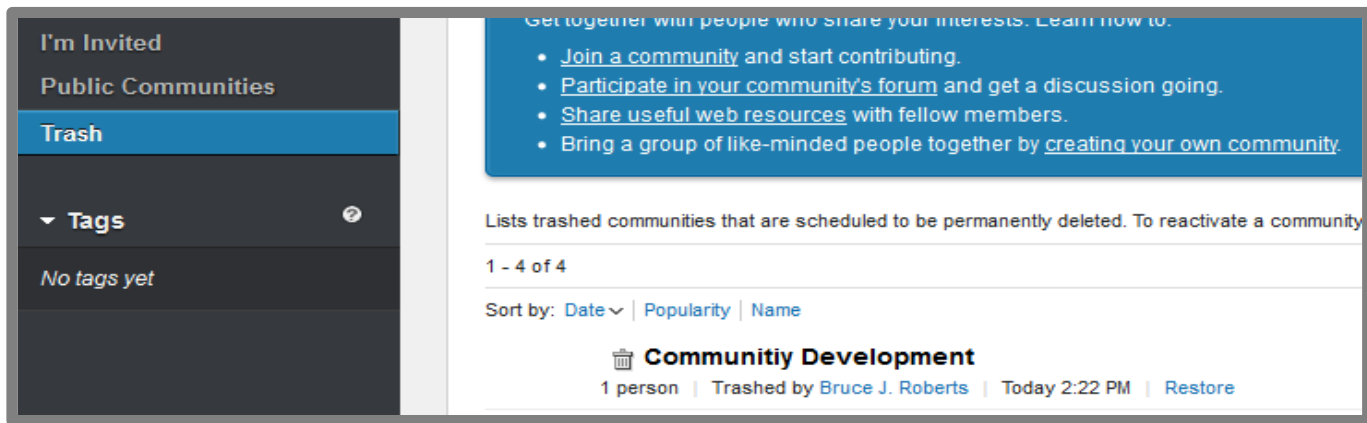

These values are case sensitive so be sure to use the correct capitalization.

Community name:

# Communities Trash User Experience

- Can be restored by Community owner or Administrator until purged by background task (default – after 90 days – controllable by Admin)

# Communities Trash

## Background Task to Purge from Trash

- Communities in trash are “purged” after 90 days by default
  - “purging” is exactly the same logic as Community Delete in 4.5 and earlier
    - All Community and component's data are deleted.
  - communities-config.xml
    - **<!-- Number of days after which a soft-deleted community will be fully deleted -->**
    - **<comm:daysToDelete>90</comm:daysToDelete>**

# Communities Trash Admin Commands

- `CommunitiesService.getSoftDeletedCommunityUuidList("date")`
  - List all soft-deleted communities deleted prior to “date”
  - `CommunitiesService.getSoftDeletedCommunityUuidList()` - lists all
- `CommunitiesService.unDeleteCommunity("communityUuid")`
  - Restore community from trash

# Communities Trash

## Some Implications for Restore

- When a sub-community is restored – parent may have been modified since time of deletion. Fixup is done if necessary to maintain Community integrity:
  - Owners of parent must be owners in sub-community.
  - Members of sub-community must be members in parent.
  - Sub-community must be at least as restrictive in access as parent.
- Note – for very typical restore case these actions won't be necessary

# Communities Trash Feed

- Community feed gets all communities in trash.
- Specified in Community services page:
  - `<collection href="http://brobertsvm3.swg.usma.ibm.com:9081/communities/service/atom/communities/trash">`
    - `<atom:title xmlns:atom="http://www.w3.org/2005/Atom" type="text">Trash</atom:title>`
    - `<atom:category xmlns:atom="http://www.w3.org/2005/Atom" scheme="http://www.ibm.com/xmlns/prod/sn/collection" term="trash"></atom:category>`
    - `<accept></accept>`
  - `</collection>`
- New category flag for Community Instance feed
  - `<category term="deleted" scheme="http://www.ibm.com/xmlns/prod/sn/flags"></category>`
  - Marks Community as being in trash.
  - Doing a PUT of the same Community ATOM entry to the trash feed **without** this category flag restores the Community from the trash.

# Communities Trash Demo

# Communities Re-parenting

- Reparenting – moving a top level Community to be a sub-community, or moving a sub-community to be top level
- Two new wsadmin commands
  - `moveCommunityToSubcommunity(parentCommunityUuid, communityUuid)`
  - `moveSubcommunityToCommunity(subCommunityUuid)`
- Error case: can't re-parent community that is already a parent, etc.
- Member and community type fixup logic shared with Community restore action

# Communities Re-parenting Public API

- Builds on existing Community instance ATOM entry
- Do a PUT to the Community's edit URL with a link to the community's new parent
  - Note – to “unparent” a sub-community, do a PUT of the sub-community to itself as parent.
- Example to make community with id **772b2cd7-e3da-455b-8c48-b67f9c6df1be** a sub-community of community with id **2ead4515-1421-4bef-a89e-313cffc46f88**:

```
<entry xmlns="http://www.w3.org/2005/Atom">
  <snx:communityUid xmlns:snx="http://www.ibm.com/xmlns/prod/sn">772b2cd7-e3da-455b-8c48-b67f9c6df1be</snx:communityUid>
  <id>http://communities.ibm.com:2006/service/atom/community/instance?communityUid=772b2cd7-e3da-455b-8c48-b67f9c6df1be</id>
  <title type="text">child</title>
  <category term="community" scheme="http://www.ibm.com/xmlns/prod/sn/type"> </category>
  <link href="http://lc45linux2.swg.usma.ibm.com/communities/service/atom/forms/community/instance?communityUid=2ead4515-1421-4bef-a89e-313cffc46f88" rel="http://www.ibm.com/xmlns/prod/sn/parentcommunity">
    </link><link href="http://lc45linux2.swg.usma.ibm.com/communities/service/atom/forms/community/instance?communityUid=772b2cd7-e3da-455b-8c48-b67f9c6df1be" rel="self">
    ...
</entry>
```

# Communities Re-parenting Demo

# A Word on What's Available When

- Connections and Communities deliver as an on-premises application AND to IBM Cloud
- Cloud first! On-premises release gets code fully vetted in cloud environment.
- To help distinguish where a feature is available I'll use these symbols:

Cloud

On-Prem

- Note that any cloud features appears in next major on-prem release.
- So.....

# Availability

4.5  
CR3

- Widget extension services

- Start Page
  - Owner can choose initial page shown for Community

- Communities Trash
  - Recover deleted communities from trash

4.5  
CR3

- Community re-parenting

# Wrapping up

- Communities is the hub for team collaboration
- Communities are extensible and programmable with new capabilities for
  - Widgets and Widget feeds
  - Trash
  - Start Page
  - Parenting
- Let me know if you want access to the demo code I showed as a way to learn more

# Capitalize on Innovation with IBM Subscription & Support

## **Access to New Software Innovations at your convenience**

- Incremental Enhancements
- Full version and release upgrades
- Patches and security enhancements
- Profile-driven download, delivery and electronic notifications

## **Access to 24x7 online & phone technical support**

- Access to technical experts and support professionals in 140 languages
- Diagnostic tools, fixes, forums, self-help, Redbooks, security alerts and technical documentation
- Rapid response to severity 1 service requests

One year included with your initial IBM Passport Advantage® or IBM Passport Advantage Express® software purchase

# Thank You!
